OVERVIEW

This Netflix Data Analysis Dashboard provides an in-depth look at the streaming platform’s content, using IMDb scores, viewer engagement, and other key attributes to offer valuable insights. Users can explore trends in content releases, compare the popularity of movies versus shows, and examine the distribution of age certifications across titles. Key metrics such as IMDb Score, Votes, and Score\*Votes help identify the most impactful content, while interactive slicers allow for customized filtering by year, runtime, rating, and more. This dashboard is designed to help users understand viewer preferences and the evolution of Netflix’s content library over time.
